

Glazed Masonry Units

Description: Lightweight concrete blocks with a thermosetting glazing compound permanently molded to on or more faces. This glazing compound is cured and heat treated in gas-fired tunnel kilns thus becoming an integral part of the unit. The glazed facings are molded in individual molds, assuring dimensional uniformity of the glazed facing regardless of minor variations in the block.

Features:

- One-Step installation – units provide finished load-bearing or non-load bearing walls in a single trade, one-step operation. You save time & money.
- Easy to clean – Special proprietary formulations create an impervious, sanitary, and chemical-resistant facing approved by the USDA. Magic market, spray paint, grease, etc. can be easily removed
- Low Maintenance – The satin finish will last the lifetime of your building and eliminates the need to repaint or refinish.
- Weather resistant – Using the most up-to-date technology, ASTRA-GLAZE-SW units provide outstanding colorfastness. Plus, built in ductility reduces the possibility of cracking and crazing in adverse conditions.
- Design flexibility – ASTRA-GLAZE-SW units offer you freedom of expression in design through a variety of colors, shapes, and scoring patterns.
