STANDARD UNIT

The Standard unit is the backbone of VERSA-LOK retaining wall systems. Its solid construction, classic proportions and top-pinning design provide the foundation for the entire family of VERSA-LOK systems. Curves, corners, columns, stairs and freestanding walls are all possible using the Standard unit alone, making it a universal favorite among contractors and designers alike.

FEATURES

- Improved performance and shear strength
- Minimal gaps between adjacent units
- Quick and easy installation
- Variable bond
- More uniform setback around curves
